ORGANISATION PROFILE

ECOBUILD is a Türkiye-based specialist SME operating at the intersection of buildings, cities and climate action. Founded by an urban planner, ECOBUILD brings more than 15 years of professional experience in sustainable built environments, climate resilience, building performance and urban sustainability.

SELECTED EXPERIENCE

- Green building and sustainability certification, including LEED-based practice
- Building energy performance, decarbonisation and sustainability assessment
- Urban planning, climate action and building-to-city sustainability integration
- Whole-building LCA and greenhouse gas inventories

CORE EXPERTISE

Climate adaptation & resilience

Climate-resilient buildings, neighbourhoods and urban adaptation

Nature-based Solutions

NbS, green infrastructure and urban heat mitigation

Water

Integrated water management and building water efficiency

Energy & carbon

Building/urban energy efficiency, GHG inventories and decarbonisation

Whole-building sustainability

Whole-building LCA, sustainability assessment and certification

Urban climate action

Climate action planning, building-to-city integration and urban/regional planning

WHAT WE CAN DO IN A HORIZON EUROPE CONSORTIUM

- Task Leader / WP Contributor
- Adaptation and resilience assessment
- Solution localisation and replication
- Building-to-city sustainability assessment
- Pilot assessment and validation
- Resilience and sustainability KPIs
- Municipal and stakeholder engagement
- Policy-to-practice translation and market uptake

CURRENT PRIORITY | EU MISSION ON ADAPTATION

HORIZON-MISS-2026-01-CLIMA-02

ECOBUILD can support the assessment, localisation, replication and uptake of actionable climate adaptation solutions, translating proven approaches into practical building-, neighbourhood- and city-scale applications for municipalities and regions.
